

Homework No. 2

(due at beginning of class Monday, April 19)

1. **Meaning relationships.** Read section 7.3 of the Language Files. Give two examples from English for each of the five meaning relationships of words described in that section (note that you should give different examples from the ones already given in the Language Files):
 - i. hyponymy (10 points)
 - ii. synonymy (10 points)
 - iii. complementary pairs (10 points)
 - iv. relational opposites (10 points)
 - v. scalar antonyms (10 points)
2. **Exploring a thesaurus (and the OSU library).** Find the *Webster's new explorer thesaurus* or the *Webster's new complete thesaurus* in the OSU Library.
 - In what section of the OSU Library is it located and what is its Library Call No.? (10 points)
 - Which meaning relationships does it provide information about? Say which they are and provide an example for each. (20 points)
 - For some words, there are several entries (i.e. several lists of synonyms, etc.). Say in two sentences why that is the case and give two examples. (20 points)
3. **Bonus question: A Visual Thesaurus** Take a look at the visual thesaurus at <http://www.visualthesaurus.com>. Try it out by typing in some words. Which meaning relations does it display and how are they displayed? Name them and give an example each. (30 points extra)
